ROSE GROWER

CAPITOL AVENUE and MABURY ROAD

(Route 5, Box 42)

SAN JOSE, CALIFORNIA

Telephone Mayfair 606

OPEN 8 A.M. to 6 P.M.

CLOSED on TUESDAY from APRIL to OCTOBER.

Friendship's Garden

*Pause by my little garden gate,
And pluck a rose or two;
That little paling fence
Need not bar my love for you.
Though we be strangers in this old world,
Friendships like flowers grow,
And fate may bring me close to you—
If you'll pluck a rose or so.*

*Pause by my little garden gate
When the flowers are wet with dew;
God put them there in that cool earth
For me to share with you.
The fragrance from their pretty leaves
Gives perfume to the air;
Come, help yourself, dear stranger—
For there are flowers to spare.*

*Pause by my little garden gate
Or throw it open wide;
And come right in, and stroll about;
The flowers are inside.
Your favorite flower will nod its head
And say—"How do you do."
So stop, dear stranger—come right in—
There's a welcome here for you.*

*Pause by my little garden gate
And tarry there awhile;
I'll give to you my flowers rare,
And we'll exchange a smile,
And who can tell what life may bring—
To me—and also you—
That is—if you will come right in,
And pluck a rose or two.*

October 1, 1948.

Dear Rosarians:

Another year has passed in which we have been privileged to enjoy you, our Rose Friends. Please feel free to call on us whenever we may be of assistance to you in growing better roses.

Cordially,

CLYDE and RAMONA STOCKING

It is our pleasure to present this little booklet of roses to you. We have endeavored to describe the newest introductions as well as the more familiar varieties as we see them. As a member of the All America Rose Selections, we are in a position to test the new introductions three years before they are released, thereby giving you the advantage of our testing. We hope you will get as big a thrill from seeing new roses for the first time as we do.

PINTO TAG

We are pleased to announce that our nursery has been the first one in Northern California to receive this award. This tag signifies that the nursery has been given a clean bill of health, and that the stock may be shipped into a number of the bay area counties without further inspection.

GIFT CERTIFICATES

We are members of the American Association of Nurserymen and can issue or accept gift certificates or merchandise orders of roses to the amount of \$5.00 and up. This service enables the recipient to select his own plants from stock of any member in the United States.

Discounts—When purchasing 10 or more plants, regardless of varieties, bushes or climbers, deduct 10%.

Packing and Shipping—On all orders of \$5.00 or more on bush and climbing roses, we shall pay delivery charges to any point in the U. S. We reserve the right to choose the best way to ship. On orders less than \$5.00, please add 50c for packing and shipping.

California Sales Tax—Please add 2½% to purchase price. This does not apply to purchasers outside the state.

Climatic conditions favoring us, we start the shipping season the middle of December and continue through the month of March. As orders are filled in rotation, it is advisable to place your order as early as convenient. If ordering after January first, we appreciate a substitute list. We shall gladly reserve your order after February first, if paid in advance.

We guarantee every plant to be true to name and to reach you in good condition. Should the plants appear dry when received, bury them in earth or wet peat moss for three or four days, soaking them thoroughly.

PLANTING and CULTURAL HINTS

Open package as soon as received. If the roots are moist, the plants may be planted at once. If, however, they appear dry, soak in water over night, and bury the entire bundle in a trench. Cover with earth and soak thoroughly. In three or four days the bushes will be ready to plant.

Cut off all bruised or broken roots with a sharp knife.

Select a location free of tree or shrub roots, and exposed to at least half a day sun.

Dig a hole 18" to 24" in depth and width. If soil does not have good drainage, a gravel drain should be provided.

It is always well to prepare soil well in advance of planting time. A mixture of 10% peat, 10% rotted manure and 10% rotted compost with 70% top soil produces excellent results.

Fill the hole half full of the mixture and firm well. Make a cone-shaped mound in center of hole. Place crown of roots on cone, spreading roots. Fill in above roots with soil and fill basin twice with water. After water has settled, remainder of soil may be filled in, making sure the bud union is level or slightly above the level of the ground. Mound soil four inches above union to prevent drying out and leave until growth starts when soil should be removed to just under bud union.

All plants are pruned moderately. After planting, canes should be pruned from six to eight inches long, with the top bud pointing outward. Keep plants well watered all during the growing period.

Roses prefer a soil slightly acid, but will tolerate a slightly alkaline soil. They seem to do well in both light and heavy soil, but **must**, however, have good drainage.

Roses are usually hungry and thirsty. One of our most common mistakes is not giving them sufficient water. Keep the ground moist. Water thoroughly each time. Frequency of watering depends on your soil, usually from one- to three-week intervals. Water in morning only.

In the early spring, mulch rose beds with either cow manure, peat moss or lawn clippings. Cow manure is excellent if clean, but foul weeds and insect pests may be brought into the garden through it. Feed each plant a half tea-cup of a well balanced commercial fertilizer every six weeks during the growing season.

If you do not use a mulch, cultivate the ground lightly after each watering; just enough to break the crust. Deep cultivating cuts the feeding rootlets.

Keep the roses well watered in summer. Allowing them to dry and go dormant causes the bushes to defoliate and sunburn.

Ground canes are the best wood on a rose bush. They are the soft new canes coming from around the bud union, with foliage and thorns identical to the older growth. Suckers come from below the bud union and have entirely different foliage, thorns and color. Suckers should be cut out as soon as identified.

PRUNING

Pruning is very important. We can not give complete instructions on pruning that will apply to all varieties and in all sections of the country. However, there are general rules that can be followed. As roses are produced on new wood, vigorous growth must be encouraged. During the dormant season, leave the new wood and cut out as much of the old wood as is possible and yet retain the form of the plant. Cut back about half of the previous year's growth, cutting $\frac{1}{4}$ inch above a leaf that is pointing on the outside of the bush. All dead and weak wood should be eliminated. Proper cutting of roses should be sufficient for summer pruning.

CUTTING ROSES

In cutting roses, always leave three or four leaves of the new blooming wood, cutting about $\frac{1}{4}$ inch above a leaf on the outside of the bush.

Cutting roses in the late afternoon has been proven to be the most satisfactory time. Double roses should be cut as the petals begin to unfurl, single roses as the sepals separate, showing the color. Mash or split the ends of the stems about a half inch and plunge immediately in cold water up to the neck of the rose. Leave out of doors over night. Occasionally a variety will keep longer by plunging the ends in boiling water. Charlotte Armstrong is one of these.

PEST CONTROL

Roses, like all living plants, have pests and diseases which attack them. These may be controlled with a little effort.

We have had excellent results by dusting with a mixture of 10% Fermate and 90% dusting Sulphur. This should not be used, however, when temperature is above 90°. If a liquid spray is preferred, Greenol and Extrax or Triogen are very effective. Fermate may be used as a spray by using one tablespoon of it with a tablespoon of wettable Sulphur and a teaspoon of Grasselli spreader to a gallon of water. Be sure to cover the under side of the foliage as well as the top.

A clean-up spray in the winter applied immediately after pruning, consisting of ten tablespoons of either Bordeaux or Lime Sulphur to a gallon of water, is very effective in cleaning up rust and mildew spores. Old leaves should be picked up and burned.

1949 ALL AMERICA WINNER

FORTY-NINER (H. Swim)

\$2.50

A most brilliant rose of vivid Oriental red with a reverse of chrome yellow changing to straw yellow. Buds are long and well shaped and have from 25 to 40 petals. Moderately fragrant. Plant is a strong grower with medium size, dark glossy foliage. A distinct novelty, which is at its best in the spring and fall. Plant patent No. 792.

1948 All America Winners

*Judged the best of the year's roses after two years of testing in
18 National Test Gardens throughout the country*

DIAMOND JUBILEE (Boerner)

\$2.00

The high centered buff yellow buds open to large flowers of buff orange. Moderately fragrant. The plant is an exceptionally strong grower (4 ft.) with large, heavy, leathery foliage. Plant patent rights reserved.

Best adapted to Pacific Northwest, Eastern and Southern sections of U. S.

NOCTURNE (Swim)

\$2.00

One of our best red roses. The buds, which are long and streamlined, are very dark red with blackish sheen. Plant is a strong bushy grower with dark green foliage. Moderately fragrant. Plant patent No. 713.

PINKIE (Dr. Lammerts)

\$1.50

Here is a perfectly formed polyantha (baby) rose with long, slender buds. The open flower is about two inches across. Pinkie is very floriferous, the blooms being produced in large cluster. It produces a very compact plant of about 18 inches with small, very disease resistant foliage. Plant patent No. 712.

SAN FERNANDO (Morris)

\$2.00

This is a satisfactory new red rose for warmer climates. Buds are long, pointed, and open to double flowers of glowing scarlet with exceptionally strong fragrance. Plant is a strong upright grower with heavy, semi-glossy foliage. Non-fading. Plant patent No. 785.

TAFFETA (Dr. Lammerts)

\$2.00

Resembling the old favorite, Mrs. Sam McGredy, Taffeta is outstanding in its ability to produce many long stemmed, perfectly formed, fragrant buds of pink to salmon, with varying color combinations. Plant is a strong, upright grower with reddish-green foliage. Plant patent No. 716.

Patented varieties of roses listed are being handled under license from the patent owners.

ANGELS MATEU

\$1.50

A gold medal winner in 1934. The large double blooms are deep old rose flushed with orange, with a ripe raspberry fragrance. An upright growing plant with large glossy, disease-resistant foliage. Plant patent No. 174.

AUTUMN

\$1.25

An unusual combination of deep burnt orange and pink streaked with red. Moderately fragrant and very lasting. The bush is a strong upright grower with an abundance of thick glossy foliage. Mildews in some locations. Excellent in coastal regions.

CHARLOTTE ARMSTRONG (W. E. Lammerts)

\$1.50

Charlotte Armstrong has established itself as one of the finest roses ever introduced. It is a strong grower, produces excellent blooms and is most generous with them. The blood red buds are exceptionally long, pointed and open to large roses which vary in color from blood red to a very deep pink according to weather conditions. A spreading grower with good foliage. Fragrant and good as a cutting rose. Patent No. 455. Judged the **best** new rose in America for 1940. Recommended for warm climates. Winner of American Rose Society Gold Medal.

CHRISTOPHER STONE

\$1.25

From all over the world come excellent reports of this lovely red rose. In our field this rose has been outstanding. The bud is long pointed, opening to a large double flower of vivid scarlet with a velvety crimson sheen. The plant is a bushy yet upright grower, about 2½ ft., with fine bronzy green foliage that has mildewed slightly. A very prolific bloomer and fragrant.

CRIMSON GLORY (Kordes)

\$1.50

In some sections of the country this rose has been acclaimed the best red rose. Of perfect form, the large, double urn-shaped flowers are a deep velvety crimson and intensely fragrant. The plant is a vigorous, bushy grower and continuous bloomer. Plant patent No. 105.

DEBONAIR (Dr. Lammerts)

\$1.50

This new yellow rose has received very favorable comment. The 50-petaled rose is primrose yellow. The bud is medium size, with a high center and opens to a very fragrant rose 3½ inches in diameter. The plant is a vigorous grower with very nice dark green, disease resistant foliage. Plant patent No. 677.

DIAMOND JUBILEE (See page 7)

DUCHESS of PENARANDA

\$1.00

Here is an appealing color. The buds are brilliant orange, opening to coppery apricot. However, this color does change at different times of the year and as the flower ages. Fragrant. The plant is a strong grower with plenty of glossy, light green foliage.

ECLIPSE (J. H. Nicolas 1935)

\$1.35

This is unquestionably one of the finest yellow roses in America. Streamlined buds of rich gold are enhanced by ornamental sepals. A tall grower with dark green foliage. An excellent cut flower with long stems. A prolific bloomer. Plant patent No. 172.

ETOILE DE HOLLANDE

\$1.25

By far the best of the better known red roses. A beautiful dark, velvety red that seldom blues. Very fragrant and excellent as a cut flower. Growth sometimes rather slow the first year, after that a vigorous grower with an abundance of disease resistant foliage. A prolific bloomer.

FAIENCE

\$1.25

In Faience we have a rose with a different color combination than in any other rose. It is a two tone of soft peach and cadmium yellow. The bud is beautifully formed, long and tapering and is cadmium yellow at the base and gradually fades to shrimp pink at the edge of the petals. In the open flower the outer side of the petals is cadmium yellow while the inside of the outer petals is China pink deepening to coppery rose in the center of the rose. A good grower, 3 to 4 feet, with large clean foliage. A continuous bloomer.

FANTASIA

\$1.50

In areas where rust is not a problem, this is a grand rose. Buds are medium size, perfectly formed, semi-double, and a golden yellow color, passing to a lighter yellow. Sweetly fragrant. Plant is a moderate grower with medium sized, dark green foliage. Plant patent No. 590.

FRANCES ASHTON

\$1.25

A strong growing, free blooming single rose of a uniform carmine color and wine colored stamens. Excellent foliage.

FRAU KARL DRUSCHKI

\$1.00

One of the oldest roses in commerce today and still one of the best white roses. The buds are large, long pointed, tinged with carmine pink, opening to large snow-white blooms. Growth about four feet.

FRED EDMUNDS

\$1.50

For our coastal regions and in the cooler climates, Fred Edmunds is a glorious rose. The slender pointed buds of burnt orange, open to beautiful roses of 25 petals of coppery orange changing to soft apricot. The plant is a moderate, bushy grower with beautiful glossy, dark green foliage. Patent applied for.

GIRONA

\$1.00

The more we see of this rose, the better we like it. The buds are long, pointed, of fine form, and are turkey red and golden yellow, a most pleasing combination. Very fragrant. The plant is a strong upright grower, with long sturdy stems similar to Pres. Hoover. Disease resistant. Excellent.

GOLDEN HARVEST

\$1.50

What a grower this rose is! An excellent plant with an abundance of large, glossy dark green, disease-resistant foliage. The large double flowers of clear golden yellow are very fragrant, reminding one of the old Marechal Niel. Adapted for coastal planting. Patent pending.

GRANDE DUCHESSE CHARLOTTE

\$1.50

 This "All American Winner for 1942", was named in honor of the Grande Duchesse of Luxembourg. The color is a new shade in roses, a rich velvety chestnut red in the bud and a tomato red as the flower opens. Buds are long and pointed, of medium size, having about 25 petals. Stems are long and strong. A tall growing plant with medium size dark green foliage. Fragrant. Prop. rights reserved.

HEART'S DESIRE

\$1.50

 An All American Winner for 1941. The long pointed double buds of rich scarlet are produced on long stems. The plant is a strong upright grower with large leathery foliage. A good cut rose and very fragrant. Plant patent No. 501.

HINRICH GAEDE

\$1.25

The bud is a clear nasturtium red opening to a large very double flower of orange red. A most prolific bloomer; bush is a vigorous grower with glossy bronzy green foliage. Fragrant.

J. OTTO THILOW

\$1.25

This is one of the finest, most perfectly formed pink roses. The flower is large, double, high centered and of a glowing rose pink. A constant bloomer. Growth is vigorous and with an abundance of thick leathery foliage.

KOROVO

\$1.25

We are convinced that Korovo is worthy of a place in your garden. Its color is old rose, shaded peach. The buds have beautiful form and are delightfully fragrant. The plant is an excellent grower with fine disease resistant foliage and a continuous bloomer.

LADY FORTEVIOT

\$1.25

It is a deep golden yellow changing to deep apricot and having a very pleasing fragrance. A vigorous, bushy grower with glossy, bronzy-green foliage and a continuous bloomer. Excellent in nearly all sections, but particularly recommended for coastal climate.

LADY TRENT

\$2.00

We are well pleased with this rose after growing it for several years. The bud is of average size, high pointed center, opening to a full double flower of copery orange. Fragrant. The plant is a medium grower with very heavy, dark green, glossy foliage, exceptionally free of disease. This rose should be excellent in coastal regions as well as in the warmer sections.

LOWELL THOMAS

\$1.50

This yellow rose is one of the best of the newer roses. The nicely formed buds of chrome yellow open to large flowers of rich yellow with a moderate tea fragrance. The plant is a strong grower with large dark green foliage that has been free of disease.

LUCIA ZULOAGA

\$1.25

Lucia Zuloaga offers a color different from any other rose. It is a deep brownish scarlet with a golden undertone. While it has but from fifteen to twenty petals, it is very attractive both in the bud and open flower; very prolific in its bloom. The plant is a vigorous spreading grower (2 ft.) with perfect glossy green foliage that has been free of disease. An excellent coastal rose.

LULU

\$1.25

We feel this old rose is worth growing. No other has such long slender perfectly formed buds as Lulu. Buds are a rich salmon rose. Plant is a medium grower, with clean foliage. A prolific blooming rose, though semi-single; excellent for cutting.

MARK SULLIVAN

\$1.25

For a display of dazzling color, Mark Sullivan is the rose to produce it. A strong growing plant with dark green foliage, it produces an abundance of flowers throughout the season. The avoid buds are golden yellow heavily veined with rose pink and cerise, a brilliant display of color in the open flower. This rose is at its best in warm climates. In cool coastal areas the bloom lacks the brilliant shadings. Plant patent No. 599.

McGREDDY'S SUNSET

\$1.35

This rose is very appropriately named! It is a high centered, double rose having a combination of light yellow, deep chrome yellow and scarlet. The plant is a vigorous grower with bronzy green foliage. A prolific bloomer and fragrant. It grows to perfection in a cool climate. Plant patent No. 317.

McGREDDY'S YELLOW

\$1.25

A really fine rose and a very prolific grower and bloomer. Flowers are large and of a bright buttercup yellow of good form. Foliage glossy dark green with deep reddish green stems. This is truly one of our finest yellows.

MME. COCHET COCHET

\$1.50

A fine rose for most sections of the country. The long, slender buds of coppery rose-pink open to semi-double blooms of the same coloring. The plant is a strong, bushy grower with large, glossy foliage. Plant patent No. 149.

MME. HENRI GUILLOT

\$1.50

This rose is proclaimed throughout the country as one of the best in cultivation today. The buds are long and pointed and of a clear orange, coral and red with gold at the base of the petals. The opening buds are urn shaped and the open flower camellia shaped. The petals have an exceptionally heavy velvety texture. The plant is one of the best found in roses with heavy dark green leathery foliage from the ground to the neck of the bloom. Very floriferous. Plant patent No. 337.

MRS. E. P. THOM

\$1.00

A medium size, moderately fragrant rose of deep canary yellow with no other shadings. A strong bushy grower with glossy foliage. An exceedingly prolific bloomer. One of the best of the older varieties.

MRS. EDWARD LAXTON

\$1.25

Although this rose has been out for some time, it is just now becoming known. The large avoid bud opens to a large, very double high centered flower of orange and old rose. An excellent cut flower with fine strong stems. Plant is a vigorous upright grower with heavy, dark green disease resistant foliage. Fragrant.

MRS. PIERRE S. DU PONT

\$1.00

For color and form, this rose is among the best. The bud is of medium size, pointed, and of a beautiful reddish gold opening to a semi-double, very fragrant flower of deep golden yellow. A strong growing plant with an abundance of disease resistant foliage. The most prolific bloomer of all the yellow roses.

MRS. SAM McGREDY

\$1.25

This rose is probably the best of the roses that this famous hybridizer has produced. It has a wonderful combination of colors, scarlet, orange heavily flushed with Lincoln red on outside of petals. Buds are large and long pointed, flowers double, fragrant and very lasting. The bush is a medium grower with abundant glossy foliage; young foliage a dark reddish green. A prolific bloomer.

NEVILLE CHAMBERLAIN

\$1.25

For beautifully formed buds, this rose is hard to beat. The color is somewhat similar to Mrs. Sam McGredy, burnt orange and salmon. The plant is a strong grower with fine foliage. Best in coastal climates. Plant patent No. 428.

NOCTURNE (See page 7)

PEACE

\$2.00

We still think Peace is one of the finest roses yet introduced. We have found that often the first bloom to come out in the spring is pale but from then on the color deepens.

The range of colors through which Peace passes is almost unbelievable. Here in our climate the opening color varies from primrose yellow to lemon yellow with edges tinged cerise. As the large 50-petal rose ages, the yellow becomes lighter while the pink to watermelon shades intensify. With the new and older bloom on the plant at the same time, one can picture the unusual and beautiful show of color, which is displayed throughout the season. The rose has fragrance, too, and it is an excellent cut flower, with superb substance.

Another crowning feature of Peace is that the plant is just as wonderful as the bloom. It is a very strong grower, four feet or more, with long, strong stems and excellent large, dark green, leathery, disease-resistant foliage.

PEACH BLOW

\$1.25

A beautifully formed fragrant double rose of peach pink, flushed and veined rose pink, with a golden base, produced on strong stems. Excellent for cutting. Plant is a very vigorous grower with dark green, leathery, disease resistant foliage. Excellent in coastal areas.

PICTURE

\$1.25

What a picture it is! Every rose seems to be perfectly formed. It is a medium size double flower with a perfectly formed high pointed center, with outer petals reflexed and unusually lasting. The color is a warm, cheerful lasting, velvety rose pink, with an undertone of salmon. Tea fragrance. The plant is a medium grower with fine thick dark green, fairly resistant foliage. An abundant bloomer.

PRESIDENT HERBERT HOOVER

\$1.25

It has a long pointed bud of orange scarlet opening to a very large flower of orange and pink. As the flower ages the bright colors fade to a creamy pink. The petals of this rose have such wonderful substance that it is an unusually fine cut flower. A very strong upright grower. Mildews slightly.

PRESIDENT MACIA

\$1.00

A lovely large double two toned pink rose. The inside of the petals is a flesh white, while the outside is veined and suffused with a rich mauve rose. Plant is a very strong grower and a profuse bloomer. Prefers warm weather. Recommended for Southern States.

RAMON BACH

\$1.25

A good rose in most climates, although it is at its best in cool weather. The large double spiral centered blooms are bright orange with a reverse of reddish gold. Plant is a vigorous upright grower with clean foliage. Fragrant. Plant patent No. 366.

RAPTURE

\$1.25

The best of the Ophelia family. A long pointed bud of pink shaded apricot. A strong grower and fragrant.

RED TALISMAN

\$1.25

This is a red sport of Talisman that originated in our field. Growth and foliage same as Talisman. Color a deep maroon red, fading to a lighter shade in the sun, which is characteristic of all red sports of Talisman.

RUBAIYAT

\$1.50

 The following is the introducer's description: Rubaiyat is a brilliant red rose with a most graceful, long shapely bud, a promise of untold pleasures and a satisfying wealth of old rose fragrance. The brilliant red to crimson color in the half open flower is accentuated by the reverse which is several shades lighter. The extra large flowers are borne on long, strong stems in great profusion. The plant is a tall, very vigorous grower with luxuriant, dark green foliage. The 1947 All America Winner. Plant Patent No. 758.

SAN FERNANDO (See page 7)

SAN LUIS REY

\$2.00

This new rose has done very well for us. The deep saffron yellow buds are medium sized and globular shaped, usually borne singly on strong stems. Very fragrant. The plant is a strong grower, with medium sized dark glossy green, disease resistant foliage. Plant patent applied for.

SANTA ANITA (Howard & Smith)

\$1.25

This rose has long pointed buds opening to a double flower of soft silvery pink. Plant is a bushy grower with large light green foliage. A profuse bloomer, and an excellent addition to the garden. Plant patent No. 539.

SATURNIA

\$1.50

For brilliancy of color, Saturnia should satisfy the critic. The large beautifully formed semi-double flowers are a brilliant cardinal red with a reverse of salmon, yellow and copper, a most striking combination. Plant is a vigorous grower with dark green leathery foliage. Plant patent No. 349.

SHOT SILK

\$1.25

A beautiful combination of orange rose overlaid with yellow and suffused with pink. Bush is a good grower with an abundance of glossy, dark green foliage. Will thrive in shade. A continuous bloomer with cup shaped, fragrant flowers.

SHOW GIRL (Dr. Lammerts)

\$1.50

This is what the introducer says about it:

Amazingly long, lovely buds, perfect for cutting, borne on long stems. The color is a rich phlox pink, deeper in the spring, lightening as the flower opens to a softer tone but always deep pink. The plant is a very strong grower with fine, large foliage—a very prolific bloomer. Plant patent No. 646.

SIERRA GLOW (W. E. Lammerts)

\$1.50

This is a lovely rose when properly grown. It should be only lightly pruned, cutting off low spreading growth to force wood upward. The long pointed buds open to fully double fragrant flowers of light pink with a reverse of orange salmon. Patent No. 521.

SIGNORA

\$1.35

This rose from Italy is a real masterpiece, in both plant and bloom. Long bud of a warm burnt sienna opening to a lighter hue toward mandarin. The plant is a tall grower (4 ft.) with every bloom on a long, strong stem. Foliage is handsome. (Colle Oppio Gold Medal 1935.) Plant patent No. 201.

SOEUR THERESE

\$1.25

It has a long pointed bud of golden yellow often streaked with carmine, opening to a large semi-double flower. Foliage is medium size and leathery. A vigorous growing plant and free blooming. Fine.

SONATA

\$1.50

We are most enthusiastic over this rose as it is one of our best cutting roses, although it blues some in the open flower. The long pointed buds of cochineal red open to full double roses of deep pink. The plant is a vigorous, upright grower with large leathery foliage quite free of disease. Plant patent No. 732.

SUSAN LOUISE

\$1.25

This lovely rose has proven satisfactory wherever grown. A seedling of the Belle of Portugal, but a bush rose and a continuous prolific bloomer. Bud is long and slender and of a deeper shade of pink than its parent; stems are long and firm. Growth is extremely vigorous and practically thornless. No garden is complete without Susan Louise.

SWEET SIXTEEN (W. E. Lammerts)

\$1.50

Here is a superb rose, particularly adapted to coastal areas. The long slender buds open to beautifully formed flowers of light pink with shades of rose and gold. These sweetly scented blooms are borne on strong stems and are excellent cut flowers. Plant patent No. 631.

TAFFETA (See page 7)

TALISMAN

\$1.00

The color is a mixture of red, yellow and copper in varying proportions. The bud is long pointed and opens to a medium size flower of the same colors. Extremely fragrant. An excellent cut flower. Growth is vigorous and upright. Mildews slightly.

TEXAS CENTENNIAL

\$1.25

Texas Centennial is a sport of the popular rose President Hoover. Type of growth is the same although it appears to have more and better foliage. Quite prolific in bloom. Flowers are brick red, having a faint tinge of gold, with a lighter center. This rose has shown up very well. A splendid exhibition rose. Plant patent No. 162.

THE CHIEF (W. E. Lammerts)

\$1.50

We like this rose for its profuse blooming qualities and the excellent plant. The long buds of deep rose flame open to large fragrant flowers of flame, coral and copper. The plant is a very strong, upright, spreading grower with large dark green leathery foliage. Plant patent No. 456.

THE DOCTOR

\$1.25

The Doctor is a fine addition to our small group of fine true pink roses. The buds are very long and pointed and open to very large double flowers of light pink. The plant is a medium grower, intensely fragrant.

POLYANTHA and FLORIBUNDA ROSES

Polyantha are the small roses usually produced in clusters and commonly called "Baby Roses". Floribunda is a new classification of the larger flowering varieties of the polyanthas. They are most effectively used in mass plantings along driveways, walls or for border planting, etc. Floribundas come in a wide range of colors and produce a mass of color over a long period of time. All of those listed below are quite free of disease.

BETTY PRIOR

\$1.00

For a mass of color and continuous bloom Betty Prior is one of the best. The single blooms, produced in large clusters, are shrimp pink on the inside of the petal and carmine pink on the outside. The plant is a very strong grower (4 to 5 ft.) with healthy, leathery foliage. Plant patent No. 340.

BRIGHT EYES (Howard & Smith)

\$1.50

A new polyantha. Individual flowers are perfectly formed, creamy white in color, fading to white, and are produced in clusters. The plant is a spreading, but vigorous grower with medium sized, dark green foliage. A continuous bloomer. Patent rights reserved.

CINNABAR

\$1.50

A medium sized semi-double bloom of brilliant cinnabar or vermilion to scarlet red. As the flower ages, the petals take on dark shadings. The plant is an excellent grower with large, glossy, dark green foliage. Disease resistant. Growth about 3 feet.

FLORADORA

\$1.50

Here is one of the new Floribundas which is different from any other rose of its type. It is a brilliant cinnabar with shades of scarlet geranium red. The 25-petaled rosette flowers are borne in small clusters and in our coastal climate blooms about eight months of the year. The plant is a tall grower, 4 feet, with excellent bronzy green foliage.

GOLDBLOCKS (Boerner)

\$1.50

Here is the best yellow floribunda we have seen so far. The buds are of medium size and open to very double, fragrant blooms which are produced in clusters. The plant is a vigorous, bushy grower, well covered with leathery, glossy, disease-resistant foliage. Plant patent No. 672.

MARGO KOSTER

\$1.00

A low, compact growing polyantha (18 inches) with an abundance of medium sized, disease resistant foliage. The blooms, which are ovoid in form, are orange red in color and are produced in clusters throughout the season.

PINK BOUNTIFUL

\$1.50

These semi-double roses, with perfectly formed buds, are two toned pink. Blooms are produced in clusters throughout the season. An excellent cut flower. Plant is a strong, bushy grower. Plant patent No. 601.

PINKIE (See page 7)

PINOCCHIO

\$1.25

One of the best of the floribunda roses. The blooms come in fairly large clusters. The small pointed buds are salmon and gold changing to a soft clear pink. The plant is a bushy upright grower with an abundance of disease resistant foliage. A continuous bloomer. Growth about 3 feet. Patent No. 484.

RED RIPPLES

\$1.25

If you are looking for a small pointed dark red bud suitable for boutonnaires, Red Ripples is perfection. Produced in large clusters, each bud is a perfect little button hole rose. Plant is a tall upright grower, a steady bloomer and with clean foliage. Plant patent pending.

ROSENELFE

\$1.00

This is one of the best of the floribundas for cut flowers. A vigorous, upright growing plant with large leathery foliage. Buds are long pointed, double La France pink. Blooms usually are produced in small clusters.

THE FAIRY

\$1.25

The Fairy is a new polyantha and one of the loveliest little roses you can imagine. The small coral pink buds open to very double flowers about an inch in diameter. They are borne in large clusters and are profuse bloomers all season. The plant is a vigorous spreading grower about 1½ to 2 ft. high and 4 to 5 ft. across. Foliage is small, dark, glossy green and very free of disease.

THE PACIFIC ROSE SOCIETY

An organization of Pacific Coast Rose lovers. We are members and shall be glad to send you an application blank. You are most cordially invited to join.

CLIMBING ROSES

CITY OF YORK **\$1.50**

The short ivory white buds open to semi-double white flowers about two inches in diameter, usually in small clusters and produced throughout the season. Growth is strong with medium size dark glossy foliage.

COUNTESS OF STRADBROKE **\$1.25**

This Australian rose is an excellent pillar rose growing about ten feet. The new foliage is a reddish green turning to dark green as it ages. The buds are large, double, of perfect form and are a dark velvety crimson. Very fragrant.

DR. JOHN GALLWEY **\$1.50**

This rose will appeal to those liking a snow-white single rose produced in great trusses. The plant is an exceptionally strong grower with glossy dark green disease resistant foliage. Especially recommended for coastal regions.

DUCHESS OF PENARANDA **\$1.25**

A strong grower, foliage and bloom same as bush variety.

CLG. ETOILE DE HOLLAND **\$1.25**

A climbing sport of our best red rose. Bloom and foliage same as the bush. One of the best red climbers, if not the best.

E. G. HILL **\$1.25**

One of our best red climbers. Bloom and foliage same as bush variety.

CLG. LADY FORTEVIOT **\$1.25**

A climbing sport of the well known bush rose. Highly recommended for coastal sections. Description under bush roses.

MERMAID **\$1.50**

Immense single flowers of sulphur yellow with amber stamens. Buds come in large clusters and bloom over a long period of time. Plant is a very vigorous grower with glossy, disease resistant foliage.

MME. HENRI GUILLOT **\$1.50**

An excellent climber. Foliage and bloom same as bush. Plant patent No. 337.

CLG. MRS. SAM McGREDY **\$1.50**

We unhesitatingly recommend this climber as one of the finest in commerce. Foliage and blooms are even better than the bush variety. The large double coppery pink blooms are produced throughout the season. A strong grower. Plant patent No. 394.

MRS. HERBERT STEVENS **\$1.25**

A most perfectly formed white bud but being a tea rose the stems are weak. A strong grower, must be planted in full sun.

PAUL'S SCARLET **\$1.25**

A most spectacular rose in the spring. Entire bush is a mass of medium size, intense, vivid scarlet blooms, often producing a scattering of summer blooms.

PICTURE **\$1.50**

One of our best pink climbers. A strong grower, more satisfactory in the climber than in the bush, but with the same high centered specimen type bloom. Plant patent No. 524.

SOUV. DE CLAUDIUS DENOYEL

\$1.25

Splendid as a pillar rose. The long pointed velvety rose buds open to large blooms of rich crimson scarlet, which are very fragrant. Blooms intermittently all season. Disease resistant foliage.

SUNGOLD (Geo. C. Thomas, Jr.)

\$1.50

This is one of the finest yellow climbers we have seen in many a day. The buds are long, pointed and a clear golden yellow. As a rule, the buds come singly on long strong stems and are freely produced throughout the season. The plant is a strong climber with clean glossy foliage. In the years we have grown it, it has been absolutely free of disease.

CLG. TALISMAN

\$1.25

A very vigorous climbing sport of the bush variety. Very floriferous.

THE AMERICAN ROSE SOCIETY

This splendid organization of nearly ten thousand enthusiastic rose lovers, fosters the growing of better roses and real rose pleasure for the amateur. Their numerous publications are filled with interest and their advisory council is always ready to be of assistance to you. You are most cordially invited to become a member. We are members and shall be glad to send you an application blank, or write directly to the American Rose Society, Box 687, Harrisburg, Pa.
